## NOTES

**You have no compass, so the directions below are relative to your start point.  
You begin in the south part of the map, facing north. Take it from there.**

**I'd recommend playing this on Normal difficulty,  
otherwise the loot objective can become quite tedious.**

*Where's Alfredo?*

In the SE portion of the map, standing in front of a flaming furnace. He looks like a zombie. (It took me 14 sword hits to kill him.)

*Where's Albertina?*

She's at the eastern-most part of the map. She looks like a female zombie. (It took me 5 broadheads to kill her.)

*Where's Raimundo?*

In the north point of the map just past the lava canal. He looks like a Hammerite haunt. (It took me 28 sword hits to kill him.)

*Where's Arnaldo?*

In the western-most part of the map, and looks like a fresh zombie.

*Where's the Horn of Triumph?*

At the north end of a north-south hallway.
